Objective

- Seeking a 1–2 month internship starting July 2026 in software development, web development, or with exposure to Artificial Intelligence projects.

Academic Profile

- First-year Engineering student in Computer Science at FST Errachidia. Curious and motivated, I enjoy understanding how systems work at a deeper level — from low-level programming in C/C++ to building structured web applications. I am continuously strengthening my problem-solving skills and seeking practical experiences where I can contribute and grow.

Education

Engineering Degree in Computer Science

Faculty of Sciences and Techniques Errachidia (FSTE), Morocco

2025–Present

DEUG in Mathematics & Computer Science

Polydisciplinary faculty of Beni Mellal, Morocco

2023–2025

Program focus: Mathematics, Computer Science, and Physics (MIP – Computer Science track)

Professional Experience

Full-Stack Developer Intern

XAI-TECH, Rabat (Remote)

Aug 2025 – Sep 2025

- Contributed to the development of web application features within ongoing company projects.
- Worked on both front-end and back-end components.
- Used Git for version control and collaborative development.
- Observed AI-related projects and gained general understanding of their development workflow.

Technical Competencies

- **Programming:** C, C++, Python, JavaScript, HTML/CSS
- **Web Development:** Front-end development, basic back-end concepts
- **Systems:** Linux, basic process Management, Bash Scripting
- **Databases:** SQL (Relational Databases), PostgreSQL
- **Networking:** Networking fundamentals (TCP/IP, basic routing concepts)
- **Concepts:** Object-Oriented Programming, Data Structures, Modular Design, Git version control

Projects

Tic-Tac-Toe Game — C

- Implemented game logic with input validation, showcasing problem-solving skills.
- GitHub Repository

Portfolio Website — HTML, CSS

- Built a responsive personal portfolio; planning JavaScript integration.
- GitHub Repository

To-Do List Web App — HTML, CSS, JavaScript

- Developed a fully functional to-do list with features like task creation, inline editing, deletion, completion toggling, and filtering (all, active, completed).
- Focused on clean, responsive, and visually appealing UI with advanced CSS styling
- Collaborated using GitHub for version control and task sharing
- GitHub Repository

Decision Tree Orientation System — C (Data Structures)

- Designed and implemented a binary decision tree system to help students choose suitable academic fields.
- Built entirely using C and fundamental data structures (trees, recursion).
- Structured for future extension into a more advanced advisory platform.

Extracurricular Activities

- Participant, GeeksBlabla on Campus – FST Errachidia (Tech community session with industry speakers)
- Participant, Cleantech Entrepreneurship Session – Ahmed Larouz
- Participant, Microsoft Community Morocco Forum – ENSA Beni Mellal (2024)

Languages

- French (Fluent), English (Fluent), Arabic (Native)
