Academic Profile

Second-year engineering student in Computer Science at FST Errachidia. Hands-on back-end development experience (Python, FastAPI, MongoDB, REST APIs, JWT authentication) gained through an internship, including technical leadership of a 4-person team on a full project, from UML design through to deployment. Looking for a back-end / full-stack development internship to keep building these skills on a project with real-world impact.

Education

Engineering Cycle in Computer Science (2nd year) 2025 – Present
Faculté des Sciences et Techniques d'Errachidia (FSTE), Morocco

DEUG in Mathematics & Computer Science 2023 – 2025
Faculté Polydisciplinaire de Beni Mellal, Morocco
Track: Mathematics-Computer Science-Physics (MIP-Informatique)

Professional Experience

Back-End Lead Developer & Project Lead Aug. – Sept. 2026
AdoptAI, Agadir (Remote) — Project: HealthCheck API Monitoring

- Designed and built the backend with **FastAPI (Python)**: REST endpoints for managing monitored services, incidents, alert thresholds, and authentication (**JWT** + 2FA/TOTP).
- Modeled the **MongoDB** database (5 collections) and set up a **scheduler** (APScheduler) for periodic service health checks and notification triggers (email, WebSocket).
- Led a team of 4 interns using **Agile/Scrum** methodology (weekly sprints, Trello, GanttPRO), with cross-team oversight of the frontend (Next.js) and database.
- Wrote the API documentation (Swagger/OpenAPI), set up tests (Pytest), and authored the internship report.

Full-Stack Developer Intern Aug. – Sept. 2025
XAI-TECH, Rabat (Remote)

- Developed front-end web features and contributed to back-end work.
- Used Git for version control and collaborative work.
- Gained exposure to working methods applicable to AI-related projects.

Technical Skills

- **Languages:** Python, Java, JavaScript, C, C++
- **Back-end & API:** FastAPI, REST APIs, JWT, WebSocket, Swagger/OpenAPI
- **Databases:** MongoDB, SQL, PostgreSQL
- **Front-end:** React, Next.js (familiar), HTML, CSS
- **Systems & containerization:** Linux (Ubuntu), Shell, Docker
- **Tools & methodology:** Git/GitHub, Pytest, Trello, Agile/Scrum methodology
- **Concepts:** OOP, data structures, UML design, application security (authentication, hashing)

Academic Projects

To-Do List Application — HTML, CSS, JS [GitHub](#)
• Built a task management app with add, edit, delete, and filtering features; responsive UI and collaboration via GitHub.

Decision-Tree Guidance System — C
• Implemented a decision tree (tree structures, recursion) to help students choose a suitable academic track.

Portfolio Website | HTML, CSS, JS [GitHub](#)
• Designed a responsive personal portfolio.

Extracurricular Activities

- Team Member, AWS Student Builders Group (AWS SBG) – UMI
- Foundation Lab Host, IT Club – FST Errachidia
- Participant, GeeksBlabla on Campus – FST Errachidia
- Microsoft Community Morocco Forum (2026)
